

The chemical structure is a complex molecule featuring several interconnected rings and functional groups. It includes a pyridine ring with a hydroxyl group (HO-) at the 3-position. A central chain contains an amide bond, a chiral center with a methyl group (CH₃) and a phenyl ring, and another amide bond. A side chain includes a pyrrolidine ring, a carbonyl group, and a chiral center with a methyl group (CH₃) and a phenyl ring. The molecule is substituted with various groups: R_a, R_b, R_c, R_d, R₁, R₂, and Y. Stereochemistry is indicated with wedges and dashes.
